ⓘ ABOUT US

Acute delivers solutions that address business intricacy with flexible enterprise applications that can be delivered quickly and cost-effectively into complex environments. It also gives companies the agility they need to stay competitive by enabling fast, flexible deployment and change on demand of business applications. Moreover the company is apt at developing frameworks based on a service-based architecture which helps in converting a design into a strong product quickly and efficiently. This gives the company the ability to develop products and projects, which have high magnitude of complexities, large volume of data and are mission critical. Our team of dedicated and highly competent professionals is making our mission statement a reality.

In a short span the company has made a strong presence into the niche market of Core Banking Solutions(CBS), Micro-Finance, Enterprise Resource Planning (ERP), Point-of-Sale (POS) software, Database Administration & Systems Integration services. In tune with the spirit of fast change of IT industry, our team is always working to develop systems that match the latest in the technology while adapting best business practices.

One of our latest offering is the most advanced stage Platform Independent Core Banking Solution. The technology will match the modern banking practices while helping banks connect their branches online with great ease.

ACUTE INFORMATICS PVT. LTD. IS A CMMI LEVEL 3 ASSESSED AND AN ISO/IEC 27001:2013 CERTIFIED IT COMPANY HEADQUARTERED IN AHMEDABAD (GUJARAT).

SOLUTION ACCELERATORS

EXTRACT, TRANSFORM, LOAD (ETL)

ETL is used to migrate data from one database to another, to form data marts and data warehouses and also to convert databases from one format or type to another. ETL is an acronym for extract, transform, load, three database functions that are combined into one tool to pull data out of one database and place it into another database.

2200+	30+
Bank's Branches	Legacy Systems

Acute's Business Solution Accelerators provide built-in software solutions & services to "fast-track" your enterprise IT needs.

RETAIL MANAGEMENT / POINT-OF-SALE (POS)

Acute's retail point of sale solution provides off-the-shelf components which allows customers to bill, exchange, return, order, tender and search for inventory across stores and warehouses, the store POS software also effectively incorporates a comprehensive retail CRM Software and CRM solution and provides service levels at the store front for tracking customer buying patterns and trends. It's an enterprise web-based solution offered on Hosted (Off-premise) and Ownership(On-Premise) model.

Bill   Exchange   Return   Order

Search for inventory across stores   Search for inventory across warehouses

ENTERPRISE RESOURCE PLANNING (ERP)

Acute's ERP Business Accelerator is aimed to deliver fully-functional ERP software to various industry verticals. It offers flexible configurations so that the unique business requirements of each customer can be incorporated with ease into the application. Small to medium sized businesses that have few customisation requirements are a perfect fit for applying the business accelerator methodology with little modification to scope and business processes being adopted.

WHY ACUTE

Quality Standards/Processes

Acute is committed to continually improve and implement best IT practices in serving it's customers. Since Acute is a CMMI Level 3 assessed organization, it's keen to progress and refine improvement by maturing & building on the CMMI foundation it has established.The Capability Maturity Model Integration (CMMI) is one of the leading models and based on best practices. Our software development team comprises of professionals from varied disciplines and verticals who adhere to best quality processes. Acute's team follows SDLC standards to implement process methodologies to ease the process of development.

We have been exceeding customer's expectations by our unparalleled inspiring innovative approach & creative work culture.

Technical Know-How

Our team members have several years of expertise developing customized, fully integrated enterprise level systems in a variety of industrial standards. Some of our team members have worked on software projects which demand high degree of expertise under severe pressure. In addition, we have a well-managed administrative
support staff to assist in meeting your needs.

Technically Advanced

Our software development tools and products implement Object-Oriented design and programming. Further, we use the most modern development tools and technologies available in the market today. We are staying on pace with the fast evolving software development capabilities with the use of RAD tools and the Internet.

Cost Effective Approach

India has low operating costs and low-cost labor, yet India is a world technological superpower with a long tradition of investment in science and engineering. Our Ahmedabad location provides us with a rich pool of technical talent and low-cost environment for operating, overhead and salaries. Therefore, we can pass on significant savings to you. Ultimately, you'll get more for your software budget.

Security

We understand the importance of intellectual property rights for you and have implemented stringent security policy. Accordingly, we respect and abide by the laws related to IPR, non-disclosure agreements and copyright act.

Availability

The Internet allows us to communicate with your team as easily as if we were in the next room. All of our project managers you will potentially interact with have strong English language skills thus eliminating language barriers. Also, because of our location in Ahmedabad (India), we can receive our feedback in the morning and address your concerns before you arrive at work the following day.
